

Morsø 2B Classic

A Classic Reborn

The Morsø 2B Classic stove is an updated version of the 2B stove, which was originally created in 1934. The 2B was one of the first Morsø stoves to feature the squirrel emblem, which has since become a Morsø trademark. By using a heat exchanger over the firebox, more heat is extracted from the fire and the greater mass of cast iron radiates more heat to the living area. The stove will easily accommodate wood lengths up to 18" and will heat 1200 square feet of living space

The original design of the stove has not been compromised in any way, but has been updated with many consumer friendly features. Along with a "state of the art" combustion system in the firebox, a glass door has been added along with a user friendly ash pan for removal of ashes and the door latches have been updated as well. Cover plates on the heat exchanger have been added for ease of maintenance and an oscillating grate will move ashes from the firebox to the ash pan. Gasketed seams will provide an air tight burn year after year. This means less maintenance and longer life for the stove.

The strength and stability of cast iron makes it an ideal material for the construction of wood stoves. The material is not only attractive, it also has a great ability to absorb heat and slowly release it, long after the fire has gone out. The Morsø Iron Foundry has 150 years' experience in the manufacture of cast iron products, and has been a purveyor to the Royal Danish Court since 1915. Today, we are the only manufacturer on the market to provide a 10 year warranty on the non-wearing components of our stoves.

Morsø is one of the world's leading manufacturers of cast iron wood stoves and exports to Europe, Japan, Australia, South Africa and the USA.

MORSØ 2B CLASSIC - FEATURES AND BENEFITS

- More than 150 years of cast iron excellence means top quality castings that sets the industry standard
- Standard bottom heat shields for reduced clearances and better heat convection
- Excellent clearances
- Flue collar for top venting
- Superior air wash system keeps the glass clean for unparalleled fire viewing
- Single air control for ease of operation
- Rugged ash pan made of heavy gauge steel for convenient ash removal
- Gasketed cast iron stove plates provide tight seals that require less maintenance through years of operation
- Chromium treated internal castings give added strength and durability
- 10 year limited warranty
